

## MARKING LICENCE

The Executive Committee for the Finnish Quality Assurance System for District Heating Pipes grants this licence based on type tests carried out in independent laboratories, initial inspection of the manufacturer's production and quality surveillance and annual external quality inspections.

Products:                      NAVAL shut-off steel ball valves for district heating, DN 20 – 600 (so called long stem valves and standard valves with the same construction)

Manufacturer/  
production plant:           Vexve Oy, Laitila, Finland

Applicant:                     Vexve Oy, Sastamala, Finland

Type test report:            SP Swedish National Testing and Research Institute, PX20393, PX20393A, 2012 and VTT, VTT-S-00372-06, 2006

The Executive Committee verifies that these products comply with the requirements given in EN 488 and recommendation L4/2012 of the Association of Finnish Energy Industries.

The licensee is permitted to use the quality mark (LT-mark) registered by the Board for Quality Assurance for marking and marketing products mentioned in the licence. This licence is valid only for the place of manufacture mentioned above.

This certificate is valid until 31.1.2016 provided that the extent, functioning and results of the manufacturer's quality surveillance and periodic testing of samples meet the specified requirements.

This licence supersedes licence n:o 40/2014.
